Session- 32

Trading Summary

Jenifa Rayee D

2nd B.Com (Honours)

TRADING SUMMARY

Summary field	Response
Number of trades reviewed	3
Number of trades closed	5
Number of open trades	0
Number of profitable trades	3
Total realised P&L	+22.27
Total unrealised P&L	0.00
Trading strategy / Strategies used	Indicator-based strategy
Number of trades following the trading plan	3
Number of trades requiring improvement	2
Number of previous mistakes avoided	2
Number of previous mistakes repeated	1
Main weakness observed	Entering trades without enough confirmation and making poor entry timing decisions.

OVERALL TRADE REVIEW

Review area	Response
What was the overall outcome of the trades reviewed?	Most trades made small profits, while a few resulted in small losses.
What worked well across the trades?	Using candlestick patterns and observing price movements helped in making trading decisions.
What problems appeared repeatedly?	Poor entry timing and entering trades without enough confirmation.
Were there repeated deviations from the trading plan?	Yes, I entered and exited trades without properly checking the market conditions and timing.
Were there repeated deviations from the selected strategy?	Yes, I did not consistently follow the signals from the SMI and RSI indicators before making trading decisions.
Which previous mistakes were successfully avoided?	I avoided some impulsive entries and tried to observe the market before trading.
Which previous mistakes continued to occur?	I continued to make mistakes by not checking the correct time to buy, not checking the correct time to sell, and not waiting for clear confirmation from the SMI and RSI indicators.

What common pattern did you observe?	I observed that poor entry and exit timing affected my trading results.
What was your main trading strength?	Observing candlestick patterns and identifying price movements.
What was your main area requiring improvement?	Improving entry timing, waiting for confirmation, and following the trading plan consistently.

Process vs Outcome review	**Response**
What was the overall trading outcome?	The overall outcome was positive, with a realised profit of 22.27, although some trades resulted in small losses.
How would you describe the quality of your trading process?	My trading process was average because I used SMI and RSI indicators but did not always check the correct entry and exit timing.
Did the outcome accurately reflect the quality of your process? Why/why not?	Not completely. Some trades made profits, but profit alone does not mean the process was correct. I need to focus on following my strategy and making disciplined decisions.

PATTERN IDENTIFICATION TABLE

Area	What pattern did I observe?
Most common strength	Using SMI and RSI indicators to identify market trends.
Most common weakness	Poor entry timing and entering trades without enough confirmation
Most common reason for entering	Entering trades based on SMI and RSI indicator signals.
Most common execution issue	Not checking the correct time to buy and sell.
Most common planning issue	Not having a clear entry and exit plan before trading.
Previous mistake successfully avoided	Avoiding some impulsive entries by observing the market first.
Previous mistake repeated	Not checking the correct entry and exit timing.
Most important pattern	Waiting for confirmation and following the trading plan can help improve trading discipline.

IMPROVEMENT ACTIONS

Area requiring improvement	Evidence / Reason	Action for future trades
Entry timing	I entered trades without waiting for clear indicator signals and proper confirmation.	I will check SMA, RSI, and support and resistance levels before entering a trade.
Exit timing	I did not plan my exit point properly, which affected my trading decisions.	I will set my target price and stop-loss level before entering a trade.
Trading discipline	I repeated mistakes in 3 trades by not following proper entry and exit timing.	I will follow my trading plan and confirm the indicator signals before making decisions.
